PsycINFO – Vejledning

PsycINFO er en bibliografisk database, som indeholder referencer fra mere end 2300 psykologiske tidsskrifter. Databasen dækker perioden fra 1806 frem til nu. Databasen indeholder også udvalgte bøger, kapitler fra bøger og disputatser. Bøger dog først fra 1987.

Adgang via ikon "E-bibliotek" på Citrix skrivebordet.

PsycINFO åbner automatisk i Avanceret søgning, og er også sat op til at lave en *emnesøgning* (**Keyword**). PsycINFO vil derfor automatisk foreslå relevante emneord (Map Term to Subject Heading).

I søgehistorikken (**Search History**) kan du se, hvad du har søgt, og hvor mange resultater der er. Søgeresultaterne ses længere nede på siden, hvorfra der kan læses abstracts m.m. Man kan også kllikke på **Display Results** ud for den ønskede søgning. De er rangordnet efter dato, således at de nyeste referencer vises først.

I stedet for emnesøgning (**Keyword**) kan der vælges at søge efter *forfatter, titel eller tidsskrift.*

Søgefelt (Search Fields)

Vælg Search Fields – her kan du bygge en søgning op ved brug af specifikke felter. F.eks forfatter, titel, abstract og mange flere. Det er også her du kan bruge nærhedsoperatorerne, som beskrives senere. Foretag dine valg og slut med Search.
